

# TextGrid Summit

## TextGrid: the future

Fotis Jannidis  
TU Darmstadt  
21.1.09

# Main Goals

- Tools and infrastructure
  - Robustness of tools and infrastructure
  - Lots of user feedback worked into the tools
  - Polish, polish, polish
- Build up a user community
  - First beta test users ling on the bleeding edge of technology
  - Later on normal users ready to use TextGrid in their projects
  - Technical users who configure TextGrid for projects
  - Developers who want to extend TextGrid with new services and tools
  - Teaching TextGrid courses, preparing documents for all groups

# Goals

- Interfaces
  - To catalogues
  - To longterm data curation projects
- Create a business model and legal framework
- Include new media objects and new disciplines
- Create a gui to make it easy to configure all aspects of the TextGridLab
- Create templates and other tools to make the development of new services easy

# Infrastructure Goals

- Integration with eSciDoc
- Integration with the upcoming DARIAH and CLARIN infrastructure

# TextGrid Summit

polish, polish, polish ...

## Thank you!
